

ATTENTION CFIs

The Denver Flight Standards District Office is pleased to announce that the CFI Enhanced Safety Program (CFI-ESP) is now available in the Denver area. This Seminar is presented at the Denver FSDO and is hosted by our Safety Program Team and will focus on issues facing today's flight instructors. Included will be a special presentation by the NTSB and a tour of the Denver Tracon Facility.

At the completion of our seminar, each participant will receive a Certificate of Completion. It clearly states that you have participated in this office's General Aviation initiative, to reduce aviation accidents that occur in the training environment, particularly with flight instructors on board the aircraft. The first CFI - ESP seminar is being offered on Tuesday, March 23rd. The seminar begins promptly at 9am and ends around 2pm. You are encouraged to be at our facility not later than 8:30, time enough for us to verify your pre-registration and for you to collect handout materials before the meeting begins.

If you are interested in the seminar, pre-registration is REQUIRED. We can reasonably accommodate a maximum of 25 guests at this seminar, but we cannot guarantee a seat to anyone not registered by 7:30am the day prior to the event. Additional details and driving directions will be emailed to registrants. Of course the ESP presentation is FREE so.....Call the Denver FSDO at 303-342-1170 to register.
